Trouble shooting

Disconnected symptom between Tittle X and PC

If the Tittle X connection does not work well after the Tittle X device is paired, delete the “tittle” device from the Bluetooth Settings and pair it again.

Trouble shooting

You may need to install a Bluetooth dongle under these circumstances

- If your PC doesn't have a Bluetooth device
- If the Bluetooth that's included with your PC has a signal range so narrow that, in order to maintain connection, the Tittle X device requires you to be at a distance unsafe to swing.

If you already have a built-in Bluetooth device in your PC and need to install a new Bluetooth dongle because the Bluetooth signal range in your PC is narrow, you have to set the built-in Bluetooth device to "Disable" in

"Settings > System > About > Device Manager > Bluetooth"

NOTICE

If you already have a Bluetooth dongle installed on your PC, you must first delete the program that was installed via the CD or Internet program provided with your Bluetooth dongle. Then you must unplug the Bluetooth dongle and reboot your PC and insert the Bluetooth dongle again and install it automatically on Windows.
